Problem Solving Approaches in PLM Industry

Sarath Reddy

In this talk, the speaker will discuss the challenges and the factors that influence the decision-making, problem solving and conflict resolution aspects in the PLM industry. Case studies will be presented from Computer aided Ergonomics and Digital Human Modelling areas to detail the problem solving approaches in various scenarios.

About the speaker

Dr Sarath Reddy is currently associated with Techno and infra team in Dassault Systems. He deals with virtual human apps for ergonomics and design. He is alumni of IISc and has 8 international publications and filed 3 patents in the area of virtual human modeling.
