# Industry Lectures

## Tata InnoVerse – Do you have solutions for our Wicked problems?

Suneel TS

Tata InnoVerse Program is the Open Innovation program of the Tata Group. It is an endeavour to bring together innovators, scientists and academicians from across the globe to solve some of the specific technical challenges facing our companies. The program interfaces academics and industry in a coherent manner. It introduces opportunities for academics to work on state-of-the-art challenges which require innovative and cutting edge solutions. The challenges open the doors for the outside world to work with industry experts.

The seminar introduces open innovation, in general, and Tata InnoVerse specifically to the participants. It also showcases challenges which are open for the creative minds to engage with the Tata companies.

### About the speaker
