About Imaginarium

Imaginarium is a leader in 3D printing and advanced manufacturing technology, housing the largest set up of 3D printers in the country. Having pioneered game-changing applications for over 50 industries, Imaginarium has helped disrupt the manufacturing sector by enabling enterprises to prototype faster, design better and realize products in shorter time spans. We are grooming the next breed of makers and innovators for another manufacturing revolution.

With a complete ecosystem of production services, Imaginarium and its range of industry-specific verticals are a platform for ideation and execution, backed up by decades of expertise. Whether it's manufacturing exquisite jewellery, innovating engineering applications or saving lives with patient-specific solutions, Imaginarium is committed to seamlessly transforming ideas into reality; and creating things that make a difference for an assortment of industries.
