

Short Bio- Rahul Mundada

Mr. Rahul Mundada believes in the transformative power of disruptive technologies, and is passionate about driving its adoption and implementation to accelerate innovation, solve challenges, and unlock new possibilities.

He started exploring 3D Printing out of curiosity and interest, and tried multiple hands-off individual projects before starting his professional career. Today, he has over 5+ years of experience in advanced manufacturing, and is currently the Product Manager-GE Additive at Imaginarium, India's leading additive manufacturing company. In his earlier assignments, he played a key role in scaling up a company from its early stages to one of India's largest companies in the industry.

He is also a Mentor of Change for Atal Innovation Mission at NITI Ayog that helps in developing new programs for fostering innovation.

Over the years, numerous workshops with audience right from school kids to DRDO scientists have been conducted by him to create awareness, share and exchange the techno-commercial learnings.

He likes running, photography, follows football, and enjoys movies and books across all genres.
